

Thank you to the web site creator, Mike Campbell

I hope you enjoy this new Northwest Chapter of ACA web site. It was a lot of work creating all of the information and text for it. However it was a pleasure working with the creator and architect of the site, Mike Campbell. I met his Mom & Dad in the Northern California Chapter many years ago.

Mike is a freelance computer guru that has been involved in development areas of embedded systems and cryptography for twenty-five years. He is now offering website development and support services as well.

I want to thank him for creating the site and suggest if you have need of his services to give him a call or e at the numbers mentioned below.
